FLOW

Flow is the epitome of everything that drives us to ride: that feeling when it's all about you, your bike and the trails. The Flow category includes products designed specifically for different types of adventures - from all-mountain mega-tours to fast home trail laps - it puts you in your own comfort zone. Although the products are designed for light weight and comfort, they still offer the necessary protection and are ready for all situations where your mindset is crucial and the trails are endless.

MADE WITH **MERINO WOOL**

From farm to fabric, Merino wool is a biodegradable, natural and renewable fiber.

All of our Merino is ethically produced from non-mulesed Australian Merino sheep. Merino wool is made from exceptionally fine fibers that biodegrade over time. Soft, comfortable, moisture wicking, odor resistant, temperature regulating, and UV protection are the main properties of this natural produce.

The basis for any ride, the Flow Merino collection does it all. Keeps you cool when hot, check. Keeps you warm whilst wet, check. Keeps you fresh after a long ride, check. Merino is a soft, lightweight and temperature-regulating fabric that insulates, breathes and dries in an instant.

The fast-wicking is delivered in a ride-ready cut that allows full movement so you can find your flow in all conditions. We've added a recycled polyamide into the weave to reduce piling and add durability for repeat usage, season after season.

Wear it on all-day epics, morning commutes, hot climbs and fresh descents, with a shell when necessary. Our Merino blend is made of 45% Wool (Merino) and 55% recycled polyamide (Nylon).

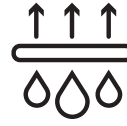

**MERINO

CARVE

Inspired by enduro riders, all-mountain shredders and bike park fans who are out riding and shredding all day. The products in the Carve category give you performance without making you look like a sponsored racer. Trails demand a lot from you, and the products in this range meet those demands. Here, performance meets protection and after the ride, it's time for a drink. Durable enough to go on run after run, every piece in the Carve range is just waiting to take off with you.

TRIGGER

Whether you're in full downhill mode battling for a world title, fast freeride or sending the biggest jumps, Trigger has got your back. Call it our competition-focused collection that pushes for the win. Focused on the details that save milliseconds so you can ride faster and harder. Designed with fits so that you can fly on race day, with more breathability when you're on the pedals and more protection if you exceed your limit. A race-ready collection that reflects our DNA.

ALL WEATHER **CARVE**

If there is one thing that we truly crave in bad weather, it is to know that the jacket we're about to put on works. That was what we set out to create with the Carve All-Weather Jacket: the most dependable piece to see you safely through the harshest conditions. This jacket is powered by our X-Stretch waterproof fabric, relying on its proven protection, adaptive fit and extreme breathability. Once the foundation was set, we zoomed in on the details, adding a fully adjustable helmet-compatible hood, YKK waterproof zippers, underarm vents, plus two traditional pockets and one on the sleeve, all of which elevate the usability of this piece to the next level. This next-gen version has a revised cut making it even more suited for riding and living.

A woman with long brown hair, wearing a white sweater, is shown in profile, working on a bicycle tire. She is holding the tire with both hands, and another person's hands are visible, also working on the tire. The background is a workshop with various tools and equipment. The image is overlaid with several semi-transparent geometric shapes, including a large white triangle on the left and several smaller white and grey shapes on the right.

CASUAL

Designed for life off the bike.
Utilising carefully crafted designs
that fit the iXS ethos and mesh
with your day-to-day.

X-MATTER/ X-RAIL

Xmatter inserts positioned across major impact zones act as a buffer between shell and EPS, deforming on soft impacts and stiffening on harder impacts to both increase helmet longevity and aid in energy dissipation.

Patented fully in-molded construction. Unique in its construction and unique in the market. Unibody in-molded EPS to eliminate weak joints. High strength to weight ratio. Increased frontal impact strength and security.

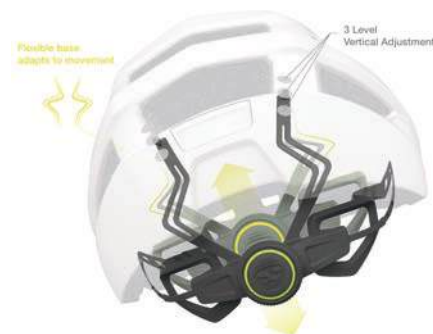

VORTEX
VENTILATION SYSTEM

Large intake vents are directly linked via channels in the EPS with multiple exhaust vents to keep cool air flowing through the helmet and ensure warm air exits.

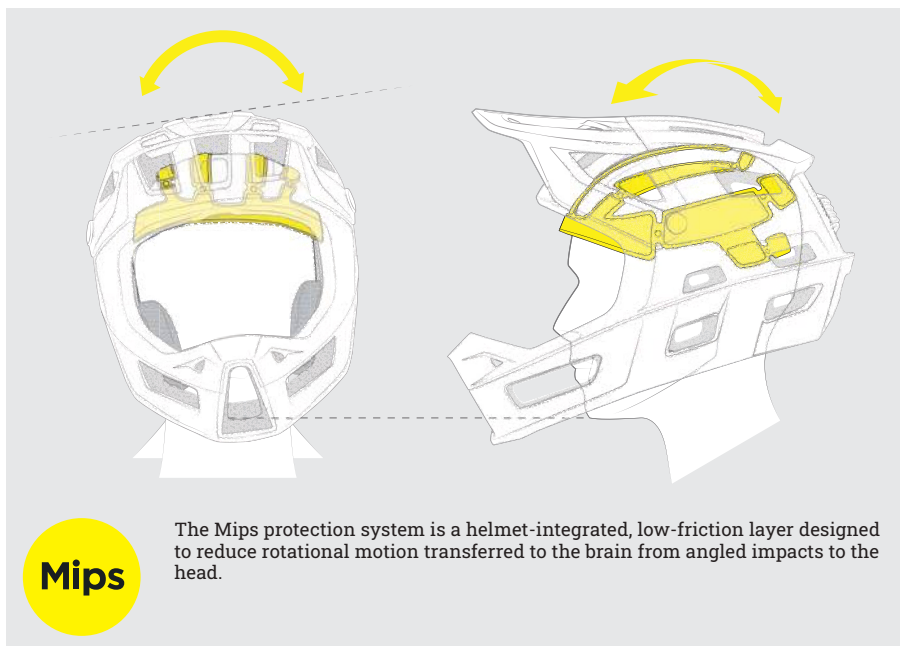

L1
mould

Optimal strength, weight and ventilation. Shock absorbing EPS (Expanded Polystyrene) foam is moulded directly to an outer hard shell.

ergo fit
ultra

Horizontal and vertical head ring adjustment. Helps to optimize fit and comfort.

3-LEVEL VISOR ADJUSTABILITY

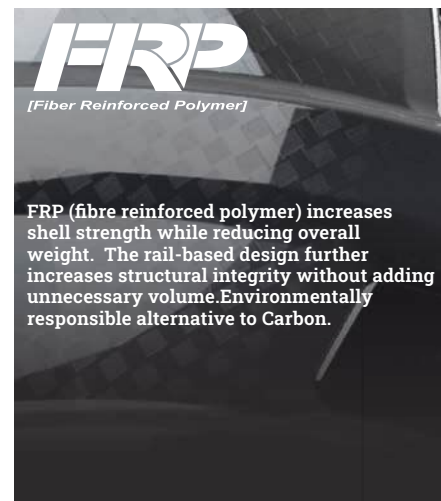

Allows space to rest goggle and to adjust visor to preferred position.

Dial disc. Micro adjustments. Easy to access and to adjust to personal comfort.

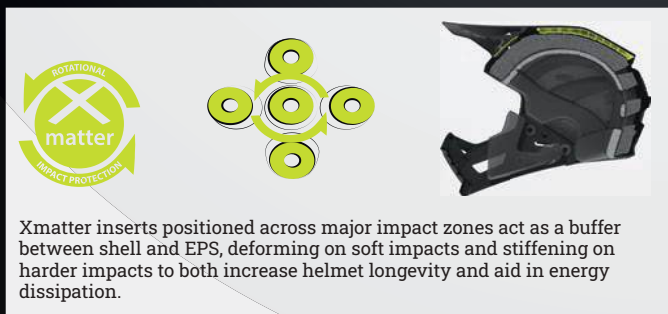

Innovative, user-friendly fastener system that combines the advantages of a magnetic fastener with those of mechanical locking functionality.

^{DH} XULT

Xmatter inserts positioned across major impact zones act as a buffer between shell and EPS, deforming on soft impacts and stiffening on harder impacts to both increase helmet longevity and aid in energy dissipation.

The Xult DH full-face helmet is designed for racers and bike park enthusiasts who like pushing personal boundaries and pursuing progression. Breathability and protection-to-weight ratio are therefore of top concern to this type of rider. With integrated Vortex ventilation channels, the Xult DH proves to be highly breathable, supplying continuous air circulation and an efficient cooling system. Strategically designed with a FRP (fiber-reinforced polymer) shell, the Xult DH requires less material, decreasing weight and volume without compromising durability. Risk of brain injury from the effects of rotational forces is thus dramatically reduced due to the combination of a more lightweight shell and the integration of Xmatter/Xrail technology, engineered to absorb impact and promote multi-directional movement. The Xult DH also comes equipped with an integrated padding system with ergonomically designed cheek pads, guaranteeing a high degree of riding comfort and a secure, comfortable fit.

005

KULT DH HELMET

Purpose built for a racing state of mind.

- FRP reinforced helmet shell
- Vortex ventilation system with integrated air channels
- Xmatter/Xtrail impact absorption liner
- Adjustable visor
- Washable padding
- Double-D safety closure
- EN1078:2012+A1, CPSC, ASTM F1952-15 + F1446-15b, KC

^{EVO} **XACT**

The Xact Evo full-face helmet is designed for racers and bike park enthusiasts who like daring technically demanding terrain. With integrated Vortex ventilation channels, the Xact Evo proves to be highly breathable, supplying continuous air circulation and an efficient cooling system, regardless if you're pedaling up or flying down. A secure yet comfortable fit is ensured by the integrated padding system, boasting a high degree of comfort and a precise fit with ergonomically shaped and removable cheek pads.

TRIGGER FF

ALL PURPOSE/ALL-DAY/RACE

One of the lightest (+/- 595g) all-mountain, trail and enduro full-face helmets designed for all day comfort, regardless of your riding discipline. The Trigger helmet provides unrivalled protection with patented inmould technology, in which the helmet shell is directly fused to the internal EPS material. Boasting a high-level of innovation, the Trigger FF remains to be the only helmet on the market designed with the unique and patented technology of one complete and seamless EPS liner unit, with inclusion of the chin guard. Because of this, the rider benefits from increased structural strength due to elimination of joints, reduced weight & volume, and increased ventilation. The numerous ventilation openings have been strategically angled and positioned to offer superior air circulation, supplying a continuous cooling system during the entire duration of your ride. Precision interlocking ErgoFit Ultra allows you to adjust the fitting ring both vertically and circumference-wise, guaranteeing a precise and comfortable fit for any head. With the 2-level visor adjustment capability, there is sufficient space to rest your goggles along the forehead yet below the visor. Completing the entire package is a Fidlock magnetic buckle which makes for a quick, efficient closure and release without compromising security.

TRIGGER FF

ALL PURPOSE/ALL-DAY/RACE

595 g UNCOMPROMISED PROTECTION

The Trigger FF combines open face breathability and ventilation with full face protection in an ultra-lightweight and compact design. The patented fully in-molded unibody construction and internal X-Frame allow for certified DH level protection while keeping the weight to an absolute minimum. At +/- 595g (*SM), the Trigger FF is nominated to be one of the lightest full face helmets in the market.

*SM = 54-58cm / ML = 58-62cm

X-FRAME

Patented fully in-molded construction. Unique in its construction and unique in the market. Unibody in-moulded EPS to eliminate weak joints. High strength to weight ratio. Increased frontal impact strength and security.

PARTY IN THE FRONT PROTECTION IN THE BACK

TRIGGER X

Open-face freedom and ventilation meets full-face rear and side coverage for a new level of protection. This fully protective, open-faced Trigger X teams first-rate ventilation with high coverage, by pairing deeper coverage at the rear with a reduced-volume front face, it's destined for the longest, hardest and hottest days on the trail. Mips and goggle compatibility are a given, plus the integrated – internal and external – ventilation channels are designed for constant air flow so you can ride easily all season long. To ramp up the comfort, we've added our ErgoFit Ultra – a two-way, ultra-precise system to fine-tune the fit, even on the fly – plus welcome details including a multi-position peak and magnetic buckle for ease of closing. This version has Mips to minimise rotational forces when you crash.

001

TRIGGER X MIPS HELMET

Streamlined open-face helmet with full protection.

- Mips brain protection system
- Adjustable, goggle compatible visor
- Dial adjuster with precision interlocking
- ErgoFit Ultra system for horizontal and vertical adjustment
- Double-Inmould, 360° Inmould shell
- Adjustable straps
- Magnetic closure
- EN1078:2012+A1, CPSC, KC
- SLAPGUARDS™ extended side protection with tapered fit for increased security
- „open-ear“ design SLAPGUARDS™ which doesn't hinder hearing and reduces heat-build up

TRIGGER AM

TRAIL/ALL-MOUNTAIN

The Trigger AM takes all the learning from its full-face sibling to create a helmet for all-mountain and trail riding that's not only super lightweight and pedal-friendly but also hugely protective in the event that things go wrong. Our in-mould system allowed us to aggressively ventilate without compromising on safety. The result: a distinctive look and the knowledge that even on a hardest climb on the hottest day, you'll keep your cool under continuous airflow. To ramp up the comfort, we've added our ErgoFit Ultra – a two-way, ultra-precise system to fine-tune the fit, even on the fly – plus welcome details including a multi-position, goggle-compatible peak and magnetic buckle for ease of closing.

GOGGLES

Sight matters. Our MTB-optimised goggles keep your vision of the trail ahead clear.

IMPACT PROTECTION

Certified and tested safety. Passes and exceeds EN1938:2012.

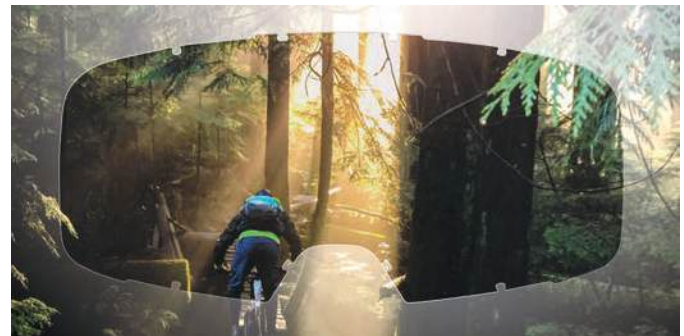

BREATHABLE COMFORT PADDING

3-layer, triple-density foam for improved comfort. High breathability, moisture wicking, highly aerated.

XOPTIC LENS TECHNOLOGY

Iridium tinting enhances definition and clarity.

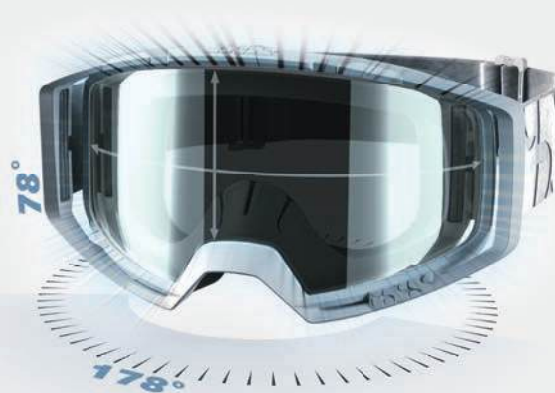

POLARIZED GLARE FILTRATION

Polarizing filters increase color saturation and decrease reflections.

WIDE VISION
178°/78°

178/78 LARGE FIELD OF VISION

A minimal frame combined with a large lens perimeter that sits lower over the nose enable a massive field view with unobstructed 178° horizontal and 78° vertical peripherals.

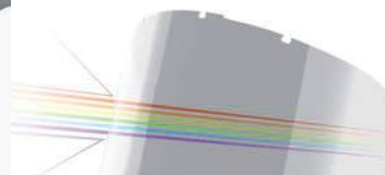

ERGONOMIC FRAME

Ultra-flexible frame distributes pressure evenly without restricting airflow. Textured inner surface reduces glare.

UV PROTECTION

UV360-380nm protection filter blocks out UV rays.

ANTI-FOG

Prevents condensation from humidity.

ANTI-SCRATCH

Reduces hairline scratches.

LP = Low Profile. \pm
+/- 5mm reduced profile

LP GOGGLES / LENSES

LP stands for Low Profile. The LP lenses/goggles are reducing the overall size of Trigger and Hack and make them fit for smaller heads and/or face openings on full face helmets. They are compatible with iXS's standard Trigger and Hack goggle frames.

001

003

TRIGGER + POLARIZED GOGGLE

Clear vision for pushing your limits.

- Wide, unobstructed field of vision (178°x78°)
- 3-ply foam for increased comfort

PROTECTORS

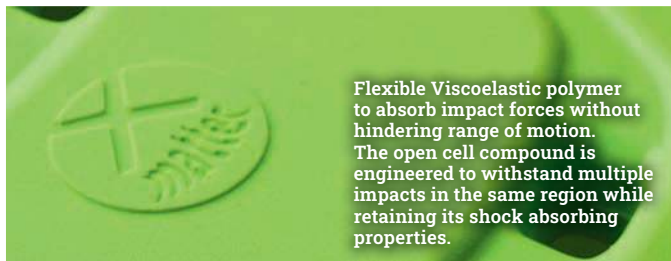

Our ultra-reliable protectors are constructed with proprietary technologies for unmatched comfort. Think high-strength impact absorption, freedom of movement, packability and sweatproof capabilities. Feel safe when riding faster.

HEX-FORM

Gel-Shell technology that unites the concept of a traditional hard-shell-like surface but with a gel-like compound. While the surface provides protection and friction reduction, the core takes care of impacts.

HEX-CELL

Low-profile Hex-Cell technology allows for maximal comfort and ergonomic flexibility for improved pedaling efficiency. Its 3D formed and linked hexagonal blocks provide protection in form of impact absorbing properties.

Flexible Viscoelastic polymer to absorb impact forces without hindering range of motion. The open cell compound is engineered to withstand multiple impacts in the same region while retaining its shock absorbing properties.

EN approved (EN1621-1) multi impact energy absorption pads. Absorbs impacts while keeping resonance to a minimum.

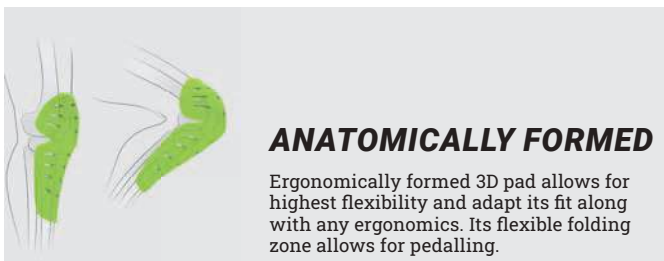

ASYMMETRICAL DESIGN

Left and right specifically and individually formed for improved comfort and fit. Prevents from moving while pedalling.

VORTEX

Large vents are directly linked via channels to keep cool air flowing through the pad and ensure warm air and humidity exit.

ANATOMICALLY FORMED

Ergonomically formed 3D pad allows for highest flexibility and adapt its fit along with any ergonomics. Its flexible folding zone allows for pedalling.

FlexZIP

Stretchable and flexible zipper allows garments to move with contours of the body without excess bunching.

Aero Mesh

Lightweight and anti-bacterial treated 3D performance mesh, optimized for breathability and moisture wicking.

Vent Mesh

For optimal moisture transport. Extremely light material

Armor 2

Dual-compound hard shells provide skid and puncture protection while remaining flexible.

Loop

Unique elastic Velcro weave ensures a secure fit without sacrificing flexibility or breathability.

ergoform

Form-fitting Ergonomic design allows for unobstructed full range of motion.

NockOut

Highly vented shock absorbent padding.

Super Light

Optimized materials ensure protectors are as light as possible for maximum comfort and reduced fatigue.

squeezebox PATENTED

Patented shell linkage allows for full articulation without sacrificing protection.

KNEE GUSSET™

Internal padding around the patella locks protector in position and distributes impact forces around the knee.

PROTECTORS HEX

HEX-FORM

Hex-Form explains iXS new Gel-Shell technology that unites the concept of a traditional hard-shell-like surface but with a gel-like compound. While the surface provides protection and friction reduction, the core takes care of impacts. Our exclusive hexagonal 3D design concept absorbs energy and distributes impact evenly across a larger surface and allows for ergonomic flexibility and therefore improved comfort and pedaling efficiency.

Hex-Form protectors are EN1621-1:2012 (L1) tested and certified.

**3D ERGO
FORMED**

Our HEX-Series is designed with all-in-one impact absorption technology. While the shell surface provides protection and friction reduction, the HexMatter core takes care of impacts.

Our exclusive hexagonal 3D design concept absorbs energy and distributes impact evenly across a larger surface. The ergonomic design and soft-shell compound allows for high levels of comfort and pedaling efficiency.

HEX-CELL

iXS low-profile Hex-Cell technology allows for maximal comfort and ergonomic flexibility for improved pedaling efficiency. Its 3D formed and linked hexagonal blocks provide protection in form of impact absorbing properties. While compressing upon impact, the deformation allow for additional shock absorption and a dissipation of impact energy over a larger surface whereas the hexagonal blocks themselves absorbing direct hits.

Hex-Cell protectors are EN1621-1:2012 (L1) tested and certified.
